

I am an astronaut.

I work in space station.

I am a space explorer.

I wear space suits.

I ride in powerful rockets to go to space.

I learn about galaxies and space!

I am a telescope.

I have a lens or mirror to see things clearly.

I can magnify distant objects in space.

I help scientists to learn about space.

I am a moon.

I am not a planet.

I am rocky.

I am big, bright ball in the night sky.

I change shape every night!

Astronauts have walked on me!

I am a star.

I am very far from the earth.

I twinkle at night sky.

I am a rocket.

I am a flying machine.

I travel to outer space.

I have big engines.

I take astronauts to space.

I am super fast and powerful!

I need a lot of fuel to fly into space.

I am a satellite.

I am a man-made object.

I orbit planets, moons, or even the Sun. ✨

I have different jobs like finding the way, watching the weather, and studying science.

I am Neptune.

I am deep blue.

I am cold and windy.

I am the coldest planet.

I have small rings too.

I am the eighth and furthest planet from the Sun.

I am Jupiter.

I am the fifth planet from the sun.

I am the biggest planet.

I am yellow and orange colour.

I am made hydrogen and helium.

I have 79 moons!

I spin very quickly.

I am the earth.

I am the third planet from the Sun.

I am blue and green.

I am not too hot and not too cold.

I have a large moon.

I am the only planet with blue oceans and green forests.

I take care of people, plants and animals!

I am Mercury.

I am the nearest planet to the Sun.

So, I am very hot.

I do not have a moon.

I orbit the sun in only 88 Earth days!

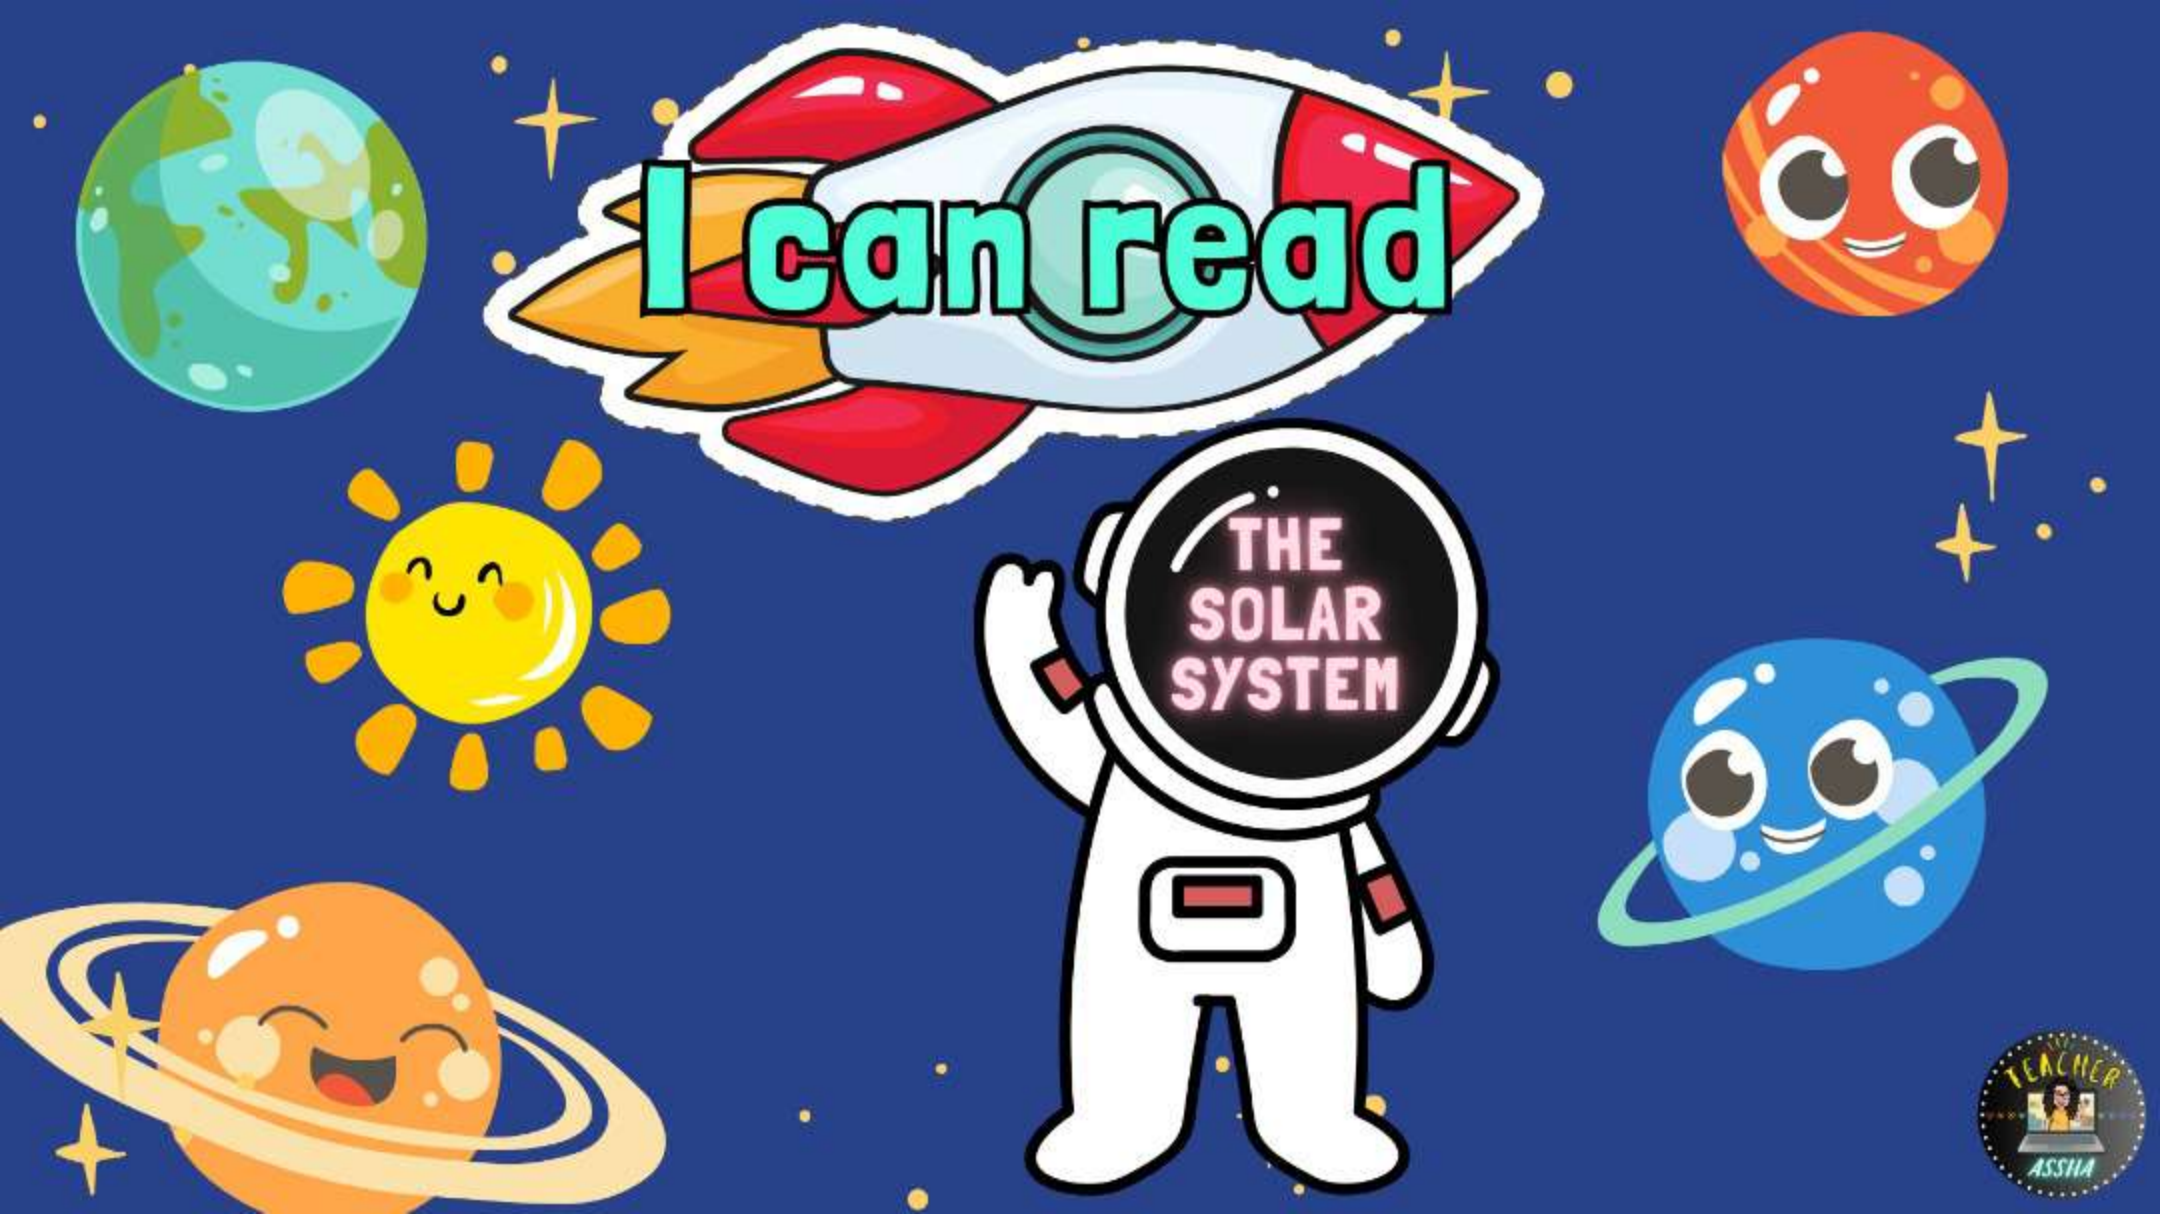

I am the smallest planet.

I am made of iron and nickel.

I can read

THE
SOLAR
SYSTEM

I am Saturn.

I am the sixth planet from the sun.

I have rings around me.

My rings are made of ice, rock and dust.

I am mostly made up of helium.

So, you cannot really stand on me.

I am Mars.

I am covered with red iron dust.

I am also called as "The Red Planet".

I am reddish-orange colour.

I am the fourth planet from the Sun.

I am between Earth and Jupiter.

I have the largest mountain in the solar system.

I am Venus.

I am second closest to the sun.

I am as big as earth.

I am yellowish-white.

I am the hottest planet of the solar system.

I am made of carbon dioxide and nitrogen.

I spin in the opposite direction from most other planets.

I am Uranus.

I am the seventh planet from the sun.

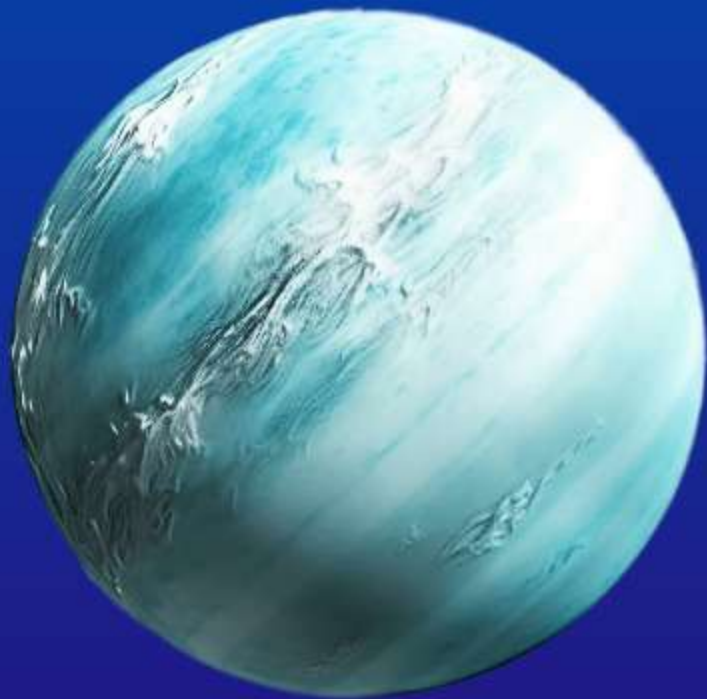

I am the coldest planet.

I am blue and green colour.

I have ice.

I spin in sideways.

I am the first planet discovered by a telescope.

I am sun.

I am hot.

I am the brightest star.

I am a big ball of fire in the sky.

I am the reason we have day and night.

I give light and warmth every single day.

All the planets orbit around me.
